### SOUTH AUSTRALIAN ECONOMIC INDICATORS

**MAY 1995** 

P.M. GARDNER
Deputy Commonwealth Statistician
and Government Statist

© Commonwealth of Australia 1995

#### **PREFACE**

South Australian Economic Indicators is a monthly publication which contains the latest available data at the time of preparation for a range of statistical series that have been identified as indicators of economic activity in this State. In a number of cases the figures presented are preliminary and subject to revision in subsequent issues.

Written and graphic commentary have been included for many of the selected series and analysis has been augmented with the calculation of the percentage change from the previous reference period together with the presentation of comparative Australian data. Time series information has been included to provide a historical perspective on many of the selected indicators. Future issues may be expanded to include further historical data in response to expressed user needs. This product is under continuous review and any suggestions for enhancement will be welcomed.

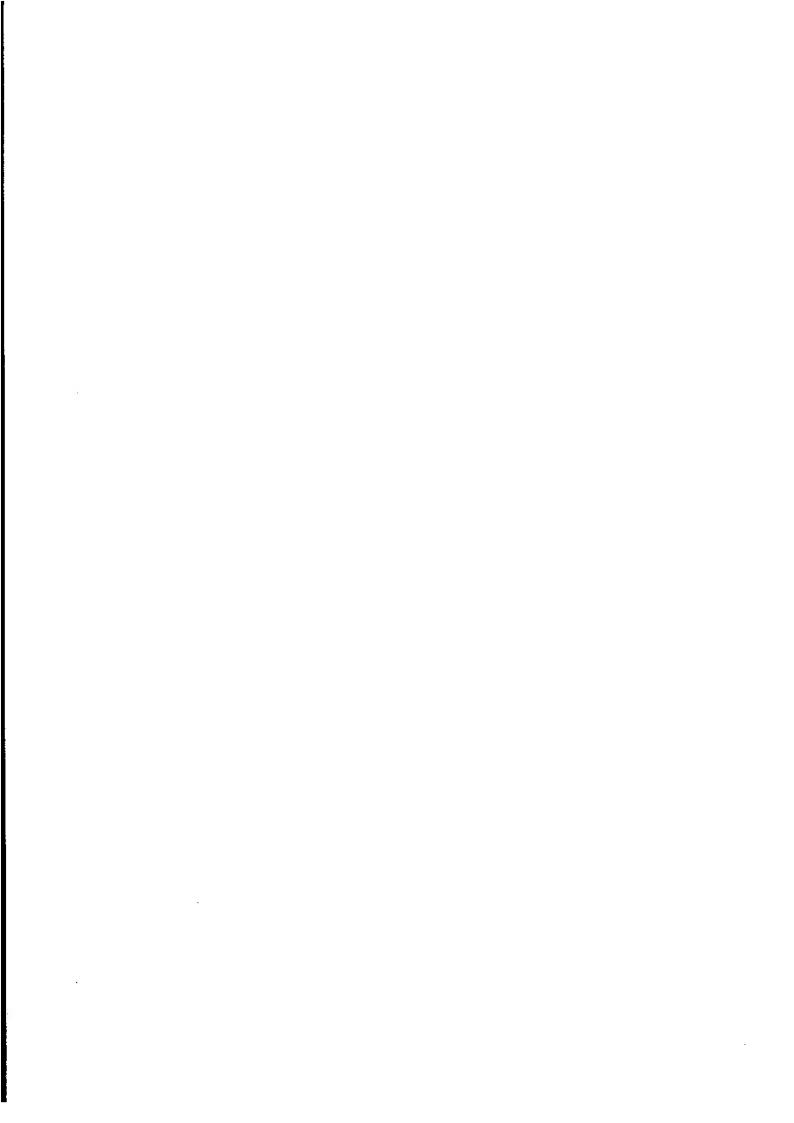

More detailed information on each series (including explanatory and technical notes) can be obtained from other Australian Bureau of Statistics publications or alternative data sources. To assist those seeking further information a source publication for each of the series has been documented in the statistical summary.

This issue includes a special article entitled *The Demography of South Australia*. Future issues will contain further articles on statistical topics which concentrate on longer term trends or other issues pertinent to the South Australian economy.

If you have any inquiries concerning this publication please contact the editor, Brian Moody, telephone (08) 237 7315. All requests for statistical information should be directed to the ABS Information Service, GPO Box 2272 Adelaide SA 5001, telephone (08) 237 7100.

#### REVIEW

#### Overview

- Gross State Product trend estimates for South Australia in 1989-90 prices showed no growth during the December quarter 1994. This was below the other States and Territories, all of which displayed some positive growth, with the national average estimated at 0.5%.
- In March 1995 the trend estimate for employed persons in South Australia was 1.9% higher than the March 1994 level, while the trend unemployment rate estimate continued the downward movement evident throughout 1994.
- Over the 12 months to February 1995, the weekly award rates of pay index for full-time employees in South Australia increased by 0.8%.
- For the first time since January 1993, monthly imports exceeded exports during February 1995. Exports to New Zealand and ASEAN countries fell to their lowest levels since mid 1994.
- The trend estimate for South Australian retail sales increased by 0.8% during February 1995 compared with an Australian rise of 0.3%.
- The provisional trend estimate for new motor vehicle registrations in February 1995 increased by 2.0 % from January. This trend has shown a consistent upward movement over the past 15 months.
- The trend estimate for total dwelling units approved in South Australia during February 1995 was 3.9% below the January 1995 figure and continued the decline in the series from its peak in July 1994.
- Total housing finance commitments for owner occupied dwellings increased by 4.6% during the month of February 1995 but this total was less than 60% of the peak level recorded in March 1994.

#### **State Accounts**

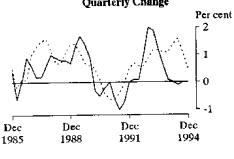

Gross State Product (GSP)

Gross State Product (GSP) trend estimates for South Australia in 1989-90 prices showed no growth (0.0%) during the December quarter 1994. This was below the other States and Territories, all of which displayed some positive growth, with the national average estimated at 0.5%. The December quarter 1994 GSP was 0.1% below the December quarter 1993 while the national average increased by 4.7%.

As South Australia exports a significant proportion of its State production interstate and overseas, the growth in GSP in constant prices can be influenced significantly by differing factors affecting the implicit price deflator and the production price deflator. For example, the State Final Demand deflator increased 1.1% for the twelve months ended December 1994 but the GSP deflator increased strongly by 5.0%, reflecting the growth in prices of a number of goods from the rural, mining and manufacturing sectors (including cereals, non-ferrous metals and motor vehicles) which are exported from South Australia.

Expressed in current prices, GSP (trend) increased 0.9% (national average 1.3%) to be 4.9% higher than December 1993. The most significant contribution to the growth of GSP in December was a 2.1% increase in Gross Operating Surplus (GOS), the highest increase of all mainland States.

GROSS STATE PRODUCT - TREND (CONSTANT PRICES) Quarterly Change

- South Australia

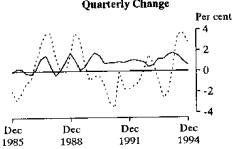

..... Australia

State Final Demand

The December quarter 1994 growth of 0.7% in State Final Demand (SFD) (trend in 1989-90 prices) was below the national average of 0.9% and represented a slowdown from the growth experienced in the earlier part of the year.

Private expenditure accounted for all of the growth, with government consumption expenditure and public capital expenditure both down 1.6% from the previous quarter. Private gross fixed capital expenditure grew by 16% over the year mainly because of a 43.9% increase in capital expenditure on equipment.

Final Consumption Expenditure

..... Gross Fixed Capital Expenditure

#### International Accounts

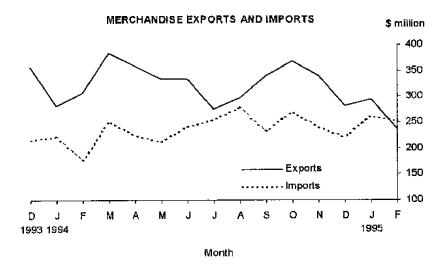

Exports

Overseas exports of South Australian produced commodities were valued at \$235.5 million in February 1995. This was 19.8% lower than the January figure and 23.3% lower than in February 1994. The biggest falls were in petroleum and petroleum products (down 58.7%), followed by cereals and cereal preparations (down 58.6%) and metals and metal manufactures (down 53.2%).

Exports to ASEAN countries fell 55.2% during February, followed by New Zealand (down 37.2%). Japan still remained the major market for South Australian goods, accounting for 16.5% of exports.

**Imports** 

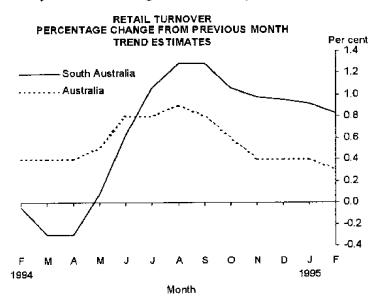

The value of overseas imports into South Australia (compiled from import documents lodged in South Australia) amounted to \$251.7 million in February 1995. This was 3.6% below the January level but 43.3% higher than February 1994. Machinery accounted for 21.4% of South Australian imports with petroleum and other petroleum products constituting 20.1%, and road vehicles, parts and accessories 18.8%.

#### Consumption and Investment

Retail Turnover

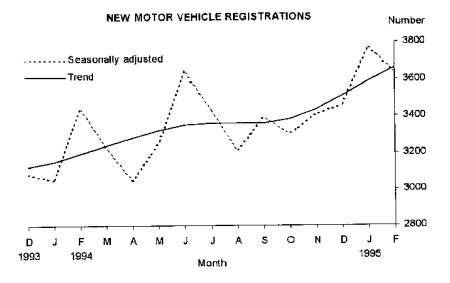

The retail trade trend estimate indicates that retail sales increased by 0.8% in February 1995 compared with an Australian rise of 0.3%. Although easing slightly, the growth rate in the trend estimate for South Australia has been strong over recent months. Industry groups showing the strongest growth in the trend estimates were hospitality and services, food retailing and clothing, and soft good retailing. The retail turnover estimate in original terms for February 1995 was \$639.8 million, a decrease of 6.3% from January 1995 but 7.9% higher than February 1994.

New Motor Vehicle Registrations

The provisional trend estimate for new motor vehicle registrations in February 1995 increased by 2.0% from January 1995. The past fifteen months have seen a steady increase in the trend series, flattening between June 1994 and August 1994 but strengthening in the last three months. The seasonally adjusted estimate for February 1995 decreased by 3.6% from January 1995 but was 5.5% higher than February 1995.

In original terms there were 3,364 new motor vehicles registered in February 1995, an increase of 17.0% from January 1995 and 5.6% more than February 1994. For new passenger vehicles only, the leading makes registered in February 1995 were Ford (708 vehicles), Holden (591), Mitsubishi (421), Toyota (386) and Hyundai (138).

Tourist Accommodation

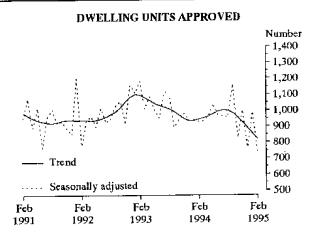

When the December quarter 1994 is compared with the December quarter 1993, the number of holiday flats, units and houses available for short-term letting deceased by 1.2%. Unit nights occupied decreased by 5.8% and consequently the unit occupancy rate fell from 41.6% to 40.0%. Accommodation takings fell by 8.8% from \$3.3m to \$3.0m while average takings per unit night occupied fell from \$63 to \$61.

Private New Capital Expenditure

The trend estimates (in seasonally adjusted current price terms) for private new capital expenditure in South Australia for the December quarter 1994 was \$568 million. The rise of 13.4% in the December quarter following rises of 19.0%. 14.4% and 4.8% for the September, June and March quarters respectively is an indicator of strong growth. Private new capital expenditure in original terms was \$636 million an increase of 33.7% from the September quarter. Buildings and structures accounted for \$79 million and equipment, and plant and machinery \$557 million.

#### **Production**

In February 1995 the trend estimate series for the total dwelling units approved in South Australia continued the downward movement apparent from August 1994. The trend estimate has fallen from the July level of 1.001 to 821 in February (18.0%). The Australian trend series peaked one month later than South Australia, registering 16,836 dwellings and since that time the trend has fallen by 21.5% to 13,211 in February 1995.

#### **Dwelling Commencements**

From the Building Activity Survey, an estimated 2,827 dwelling units were commenced in South Australia during the December quarter 1994. a decrease of 8.3% from the previous quarter compared with a corresponding decrease of 7.5% nationally. The latest figure for South Australia represents a 1.0% increase in the number of dwelling units over the December quarter 1993 and this compares with a 2.8% increase nationally.

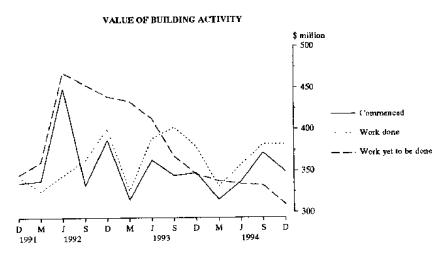

Value of Non-residential Building Approvals The value of non residential building approved in February 1995 was \$26.8 million. 14 5% higher than the preceding month. For the seven months ended February 1995 there was \$242.5 million of work approved compared with \$251.4 million for the corresponding period of the previous year. At the Australian level, non residential building valued at \$905.9 million was approved in February 1995, compared with \$631.5 million for the previous month. Substantial increases in the offices, health and miscellaneous building categories were primarily responsible for the increase in February. The combined effects of the state and national movements resulted in South Australia accounting for only 3.0% of all non residential approvals in Australia.

Value of Total Building Activity

The total value of building work commenced during the December quarter 1994 was down \$22.8 million or 6.1% from the previous quarter to \$348.9 million. A fall in private sector commencements, including a fall of \$12.8 million for new residential building and \$5.7 million for non-residential building accounted for most of the decrease. Building commencements in South Australia comprised 4.9% of the national total in the December quarter.

The total value of building work done during the December quarter 1994 was \$382.1 million, virtually unchanged from the previous quarter. Work done in both the residential and non-residential categories were also virtually unchanged. This compares with a national increase in total work done for the December quarter of 4.4%.

Building work yet to be done was valued at \$309.4 million at the end of December 1994, a fall of 6.9% from the previous quarter and the tenth successive quarterly fall. Compared with a year earlier, work yet to be done was down 10.6% in South Australia but up 10.3% nationally. Following these movements work yet to be done in South Australia comprised only 3.5% of the national figure for the December quarter 1994.

Value of Engineering Construction

In the December quarter 1994, engineering construction work done in South Australia rose 7.9% to \$169.2 million with the industry categories of roads, highways and subdivisions, and telecommunications being the main contributors to the increase. However, this was still 9.9% below the level of a year earlier. For Australia the December quarter 1994 figure was 5.3% up from the previous quarter and 4.7% up from a year earlier.

#### **Prices**

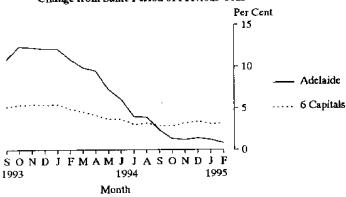

Consumer Price Index

In the December quarter 1994 the all groups Consumer Price Index (CPI) increased by 0.8% nationally and this contributed to an annual increase of 2.5%. For Adelaide the quarterly increase was 1.0% and the annual movement to the end of December 1994 was 2.8% - the second highest increase in Australia.

House Building Materials

Perth and Canberra recorded a 0.1% fall in prices for house building materials during the month of February. Prices rose in Adelaide by 0.1% with Hobart recording the greatest rise of all the capitals (0.7%). Over the past twelve months Adelaide has had a price rise of 0.8% with the two largest rises occurring in Hobart (4.7%) and Perth (3.9%).

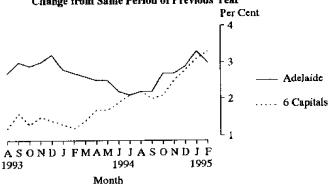

#### MATERIALS USED IN HOUSE BUILDING Change from Same Period of Previous Year

Non-house Building Materials

Adelaide had a rise of 0.3% in the price of non-house building materials during February. The smallest rise was recorded in Canberra (0.2%) and the largest in Brisbane (0.6%). For the past twelve months, Adelaide recorded a rise of 3.0% compared with Hobart the lowest of the capitals at 2.2% and Sydney the highest at 3.9%.

#### MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING Change from Same Period of Previous Year

House Prices

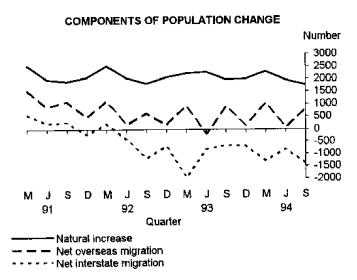

Nationally, between the September and December quarters 1994, established house prices decreased by 0.4% while project home prices increased by 0.8%. Over the same period prices of established houses in Adelaide fell by 2.2% while the prices of project homes rose by 0.6%.

On an annual basis the December quarter 1994 prices for established houses rose by 3.4% nationally while the increase for project homes was 2.8%. At 3.0%, the annual increase for established houses in Adelaide was below the national figure but the rise in prices of project houses in Adelaide (3.7%) was well above the national increase.

#### **Labour Force and Demography**

Population

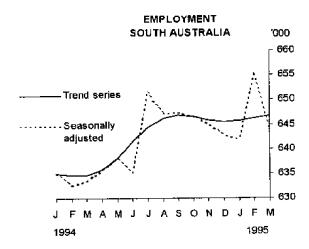

The estimated resident population of South Australia increased by 1,171 persons (0.1%) during the September quarter 1994 to 1,470,955. For the twelve months ended 30 September 1994 the growth rate for South Australia was 0.4%, well below the national average of 1.1%.

Employment

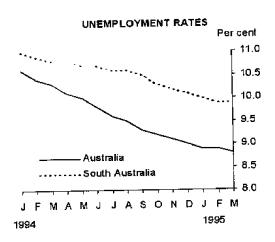

The underlying trend estimate of employed persons in South Australia has been increasing over the past three months following a general decline between October and December 1994. The March 1995 estimate (646,800) was 1.9% higher than the level of 12 months ago.

The underlying trend estimate of employed persons in Australia has been increasing since February 1993, reaching 8,146,100 in March 1995. Over the past 12 months, full-time and part-time employment have increased by 3.0% and 7.5% respectively.

Unemployment

The provisional trend unemployment rate for South Australia continued the general downward movement evident throughout 1994, reaching 9.9% in March 1995. Between February 1995 and March 1995, the trend unemployment rate for males decreased by 0.1 of a percentage point to 10.7%, while the rate for females remained at 8.8%.

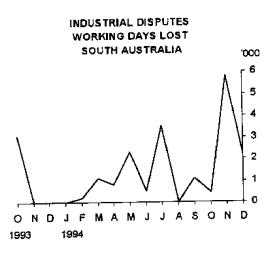

Overtime

The proportion of employees who worked overtime in South Australia in February 1995 was 16.3% compared with 16.8% in February 1994.

Industrial Disputes

There were 2,200 working days lost through industrial disputes in South Australia during December 1994. At 4.5% of the Australian total (49,000 working days), South Australia had a relatively low level of disputation.

In the twelve months to December 1994, 18,000 working days were lost through industrial disputation in South Australia.

Short-term Overseas Visitors Arrivals Short-term visitor arrivals to South Australia in December 1994 fell by 7.1% from November 1994 to 7,835. This was 14.8% lower than the December 1993 total. The 1994 annual figure (69,713) was 4.2% higher than in 1993.

The December 1994 figure for Australia showed an increase of 23.6% from November to 383,989 and was 11.6% higher than December 1993. The number of short-term visitors to Australia in 1994 was 12.1% higher than 1993 and 29.0% higher than 1992. The major source countries for these visitors over the past three years were Japan, New Zealand and the United Kingdom.

Short-term Resident Departures

South Australian short-term resident departures for December 1994 totalled 11,534. This number was 41.1% higher than in November 1994 and 12.3% above December 1993. South Australian departures increased by 1.0% from 1993 to 114,816 in 1994.

Short-term departures from Australia increased from November to December 1994 by 51.5% to 264,470, and were 5.2% higher than in December 1993. The number of short-term departures of Australians in 1994 was 3.8% higher than in 1993 with the main destinations being New Zealand, United States of America, United Kingdom and Indonesia.

#### Incomes

#### Average Weekly Earnings

Average weekly ordinary time earnings of full-time adult employees in South Australia decreased from \$602.60 in August 1994 to \$598.70 in November 1994. Male full-time ordinary time earnings fell from \$628.20 in August 1994 to \$619.30 in November 1994. Over the same period, the comparable level for females rose from \$553.70 to \$558.10.

Average weekly total earnings of all employees in South Australia were \$505.20 in November 1994, down from \$507.40 in August 1994.

Since it is an average of earnings across all employees, changes in average weekly earnings may occur through changes in employment as well as changes in pay levels.

#### Award Rates of Pay

Over the 12 months to February 1995, the weekly award rates of pay index for full-time employees in South Australia increased by 0.8%.

For full-time adult male employees, the largest annual movement of the index occurred in the construction industry (an increase of 2.8% from February 1994).

For full-time adult female employees, the largest annual movement of the index occurred in public administration and defence (an increase of 1.4% from February 1994). Employees in the defence forces were excluded from these estimates.

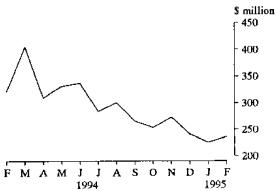

#### Financial Markets

#### Housing Finance

Total housing finance commitments for owner occupied dwellings increased by \$10.5 million (4.6%) to \$236.4 million during the month of February 1995 but this total was less than 60% of the peak level of \$404.5 million recorded in March 1994.

The main component, financing commitments for the purchase of established dwellings was up by \$3.9 million (2.6%) to \$153.4 million which is well below the equivalent month last year. Financing commitments for construction of dwellings rose by \$3.7 million (13.8%) to \$30.6 million. Purchase of newly erected dwellings decreased significantly by \$3.5 million (30.2%) to \$8.1 million.

### SECURED HOUSING FINANCE COMMITMENTS TO INDIVIDUALS SOUTH AUSTRALIA

Personal Finance

Personal finance commitments increased marginally in February by \$5.8 million (3.6%) to \$168.1 million from the revised January figure of \$162.2 million.

The main category, sales of used motor vehicles and station wagons under fixed loan commitments decreased by \$4.4 million (11.4%) to \$34.0 million but was partially offset by the large increase in sales of new motor vehicles and station wagons which increased by \$2.9 million (21.4%) to \$16.2 million.

Total personal finance commitments under fixed loan commitments increased slightly by \$0.3 million (0.2%) to \$116.4 million in February 1995, the highest February figure recorded. Total personal finance commitments under revolving credit commitments increased by \$5.6 million (12.1%) to \$51.7 million.

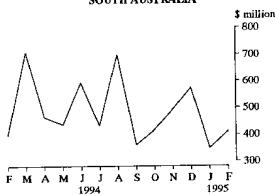

Commercial Finance

Total commercial finance commitments rose in February by \$62.3 million (17.9%) to \$411.0 million. A large increase was recorded for commitments under fixed loan facilities and for commercial finance commitments under revolving credit facilities.

Commercial finance commitments under fixed loan facilities increased by \$34.3 million (19.3%) to \$211.9 million. The greatest increase occurred for the industry group 'property and business services' which rose by \$11.3 million from the relatively low January figure.

Commitments under revolving credit facilities increased by \$28.0 million (16.4%) to \$199.0 million with the category 'manufacturing' up by \$46.4 million to \$61.3 million from the low figure recorded in January of \$14.9 million.

Lease Finance

The value of goods under new finance lease commitments has continued to fall from the peak of \$36.1 million in June 1994. In February new finance lease commitments totalled \$17.3 million a decrease of \$4.1 million (19.0%) from the January 1995 figure of \$21.4 million.

Lease commitments for new motor vehicles and station wagons not subject to depreciation, the largest category of motor vehicles, increased by \$0.9 million (20.3%) from the low January total of \$4.4 million. Total motor vehicles under new finance lease commitments increased by \$1.3 million (12.8%) to \$11.5 million.

The main fall in goods under new finance lease commitments was for 'electronic data processing equipment' down \$3.8 million (70.2%) in February to \$1.6 million from the high January figure of \$5.4 million. 'Office machines' recorded the second largest decrease falling by \$2.7 million from the high January figure of \$3.4 million.

#### **FOCUS**

#### The Demography of South Australia

This article has been compiled from various Australian Bureau of Statistics sources by Brian Moody.

#### Introduction

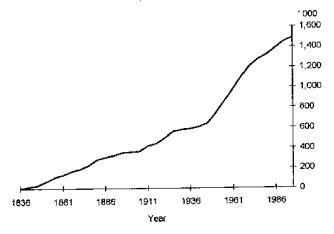

At 30 June 1994 there were 1,469,784 persons resident in South Australia, 729,719 males and 740,065 females. Of these 1,076,434 (73%) resided in the Adelaide Statistical Division.

#### **Population Growth**

At the Census on 26 February 1844, 17,366 persons (excluding the Aboriginal population) were counted in South Australia. By 1861 the count had reached 126,830 and had more than doubled by the 1881 Census. In 1921 the census count was almost 500,000 and it is estimated that the population passed 1 million in January 1963. Important factors affecting the rate of population growth over this period included:

- the net migration, particularly of males, away from South Australia following the mineral discoveries in other States in the 1880s and 1890s;
- the slow growth during the economic depression of the 1930s when natural increase fell to a relatively low level and continued during the early years of the 1939-45 War;
- the rise in the rate of natural increase accompanied by the high level of overseas migration from the post 1939-45 War period until 1960: and
- the decline in both natural increase and overseas migration from the mid 1960s.

#### POPULATION, SOUTH AUSTRALIA

The rate of population increase was slower in South Australia than for Australia from 1881 to 1947. However, from 1947 to 1966 the steep rise in migration contributed to a growth rate above that of Australia. Since 1966 this State's growth rate generally has been below the Australian rate.

Between 1981 and 1986 Western Australia became the fourth most populous State ahead of South Australia which had held that position from Federation.

### INTERCENSAL COMPOUND ANNUAL POPULATION GROWTH RATES, SOUTH AUSTRALIA AND AUSTRALIA

	Per cent growth rate per annum					
Period	South Australia	Australia				
1861-71	3.88	n.a.				
1871-81	4,03	n,a.				
1881-91	1.36	3.51				
1891-1901	1.29	1.74				
1901-11	1.32	1.67				
1911-21	1.94	2.01				
1921-33	1.32	1.65				
1933-47	0.76	0.96				
1947-54	3.05	2.46				
1954-61	2.83	2.26				
1961-66	2.47	2.00				
1966-71	1.85	2.41				
1971-76	1.20	1.44				
1976-81	0.69	1.24				
1981-86	0.95	1.43				
1986-91	0.91	1.53				

In recent years several factors have contributed to South Australia's low rate of population growth, including the lowest rate of natural increase of the States and Territories, a relatively low level of overseas immigration and a net outflow in interstate migration.

In 1993 there were 20,178 births registered to South Australian residents and deaths were registered of 11,576 South Australian residents. The crude birth rate was 13.8 per 1,000 population while the crude death rate was 7.9 per 1,000 population. The net gain in overseas migration (the excess of arrivals over departures) was 1,764 persons and the net loss from interstate migration was 4,138 persons.

Details of the components of population change in South Australia for the last six financial years are given in the following table.

### COMPONENTS OF RESIDENT POPULATION CHANGE SOUTH AUSTRALIA

Year	Natural increase	Net overseas migration	Net interstate migration	Total population growth(a)
1988-89	8,664	6,665	-221	14,120
1989-90	8,253	5,762	-252	13,027
1990-91	8,767	4,619	1,545	14,243
1991-92	8,532	2,897	-133	11,296
1992-93	8,403	1,546	<b>-4,6</b> 50	5,299
1993-94	8,230	2,126	-3,466	6,890

(a) Differences between the total growth and the sum of natural increase and net migration arise from retrospective adjustments (made after each census) to eliminate any intercensal discrepancy

#### Birthplace

Of the persons counted in South Australia at the 1911 Census 85.7% were Australian born and this proportion had increased to 93.3% by 1947. The high rate of overseas migration in the post 1939-45 War period helped to lower the proportion to 86.1% in 1954 and further to 76.1% in 1991.

Although, over the past 40 to 50 years the proportion of overseas born people in South Australia has increased, the proportion of persons in South Australia born in the United Kingdom (including the Republic of Ireland) has decreased steadily from 12.7% in 1976 to 10.9% in 1986 and 10.4% in 1991. The proportion born in Asian countries has increased from 2.0% in 1986 to 2.6% in 1991.

### CENSUS COUNTS: SOUTH AUSTRALIA, COUNTRY OF BIRTH (PERSONS)

	(PERSONS)		
Country of birth	Census 30 June 1986	Census 6 August 1991	Increase
Australia	1,029,470	1,065,284	35,814
New Zealand	8,287	10,087	1,800
Europe:			
United Kingdom and Republic of Ireland	145,404	145,872	-532
Other	105,459	106,195	736
Asia	27,413	36,481	9,068
America	5,934	7,309	1,375
Africa	4,395	4,884	489
Other countries	1,852	2,036	184
Total born outside Australia	299,744	312,694	12,950
Total (including not stated)	1,345,945	1 <u>,</u> 400,62 <u>2</u>	<b>54</b> , <b>677</b>

#### **Geographical Distribution**

The Australian Standard Geographical Classification divides the State into seven statistical divisions. Each of these is further divided into statistical subdivisions which consist of a number of statistical local areas.

### ESTIMATED RESIDENT POPULATION STATISTICAL DIVISIONS

	Persons at 30 June						
Statistical Division	1986	1991	1994				
Adelaide	1,003,548	1,057,161	1,076,434				
Outer Adelaide	82,091	93,200	102,250				
Yorke and Lower North	43,217	43,881	44,700				
Murray Lands	65,585	67,443	66,928				
South East	63,126	62,855	62,044				
Eyre	34,927	33,165	32,724				
Northern	90,058	88,594	84,704				
Total State	1,382,550	1,446,299	1,469,784				

At population censuses, counts are available for urban centres and rural localities. These consist of one or more adjoining census collection districts with urban characteristics. Urban centres are defined as population clusters of 1,000 or more people and rural localities are defined as population clusters of between 200 and 1,000 people.

#### PERSONS COUNTED IN URBAN AND RURAL AREAS

	Urba	n		Total (including
Census	Adelaide	Other	Rural	(including migratory)
1971	809,482	183,187	179,148	1,173,707
1976	857,196	198,777	187,546	1,244,756
1981	882,520	207,934	193,628	1,285,033
1986	917,000	221,036	205,625	1,345,945
1991	957,480	235,088	207,535	1,400,622

Between 1986 and 1991 centres beyond Urban Adelaide (a subset of the Adelaide Statistical Division) which experienced the greatest population growth were mainly towns within 100 kilometres of Adelaide and included those in the Adelaide and Outer Adelaide Statistical Divisions. Growth in other centres throughout the State tended to be variable; for example, in the 'Iron Triangle' the population in Port Pirie increased while Port Augusta and Whyalla declined.

At the 1991 Census only 16.8% of the South Australian population was located in urban centres outside the capital city. This was low compared with New South Wales, Victoria and Queensland, each of which had at least six centres outside the capital with populations in excess of 20,000. In South Australia only Whyalia and Mount Gambier met this criterion.

#### **Fertility**

Although in 1993 there were substantially more births than deaths, fertility conditions resulted in a net reproduction rate (NRR) of 0.86. The NRR is the number of female children a woman could be expected to bear if she is subject to the fertility and mortality conditions prevailing in a given year throughout her child-bearing years. It is thus a measure of a population's ability to replace itself and in the long term a NRR of 1.0 would produce zero population growth from natural increase. The NRR for South Australia has been below 1.0 since 1974. However, because the population is still relatively young, natural increase is likely to be positive for many years into the future.

Features of the falling fertility in the State include the rising median ages of both mothers and fathers at first and subsequent births, the very low proportion of third and subsequent children born to mothers, and the declining numbers born to mothers aged less than 30 years.

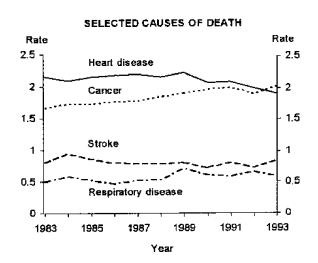

However, an offsetting factor is the rising number of births to mothers aged 30 and over, which seems to indicate that many women have chosen to defer child bearing until later in life.

An interesting aspect is the increasing number of ex-nuptial births in South Australia; the proportion of ex-nuptial births rose from 14.6% in 1985 to 25.4% in 1993. However, this phenomenon has been accompanied by increasing numbers where fathers have acknowledged paternity; in 1993 paternity had been acknowledged for more than four-fifths of ex-nuptial births. This suggests that ex-nuptial births to couples in stable partnerships are becoming more common.

#### Mortality

The crude death rate in 1993 was 7.9 per 1,000 mean resident population with the male rate at 8.3 and the female rate 7.5. The Australian rate was much lower (6.9 per mean resident population) thus reflecting the older age structure of the population in this State. The median age at death was 73.7 years for males and 79.9 years for females.

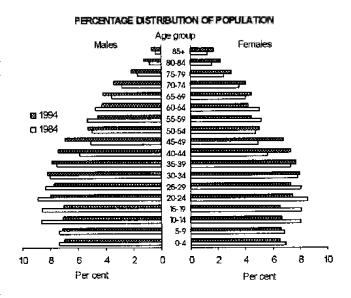

The major causes of death in 1993 were malignant neoplasms (cancer) 2,967 deaths (25.7%), ischaemic heart disease 2,918 deaths (25.3%), and cerebrovascular disease (stroke) 1,258 deaths (10.9%).

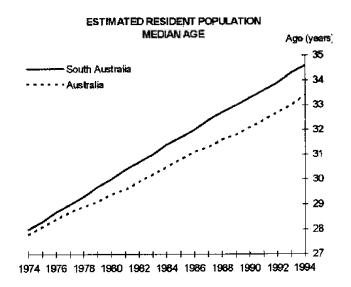

Based on the mortality conditions prevailing in South Australia in 1993, life expectancy for males at birth was 75.0 years and for females 80.5 years. This compares with life expectancies of 69.4 years and 75.6 years respectively in 1971.

#### Ageing Population

At 30 June 1994 there were 401,033 persons (27.3%) aged less than 20 years, 869,576 (59.2%) aged between 20 and 64 and 199,175 (13.6%) aged 65 and over. At the 1981 Census there were 33% aged less than 20 and 11% aged 65 and over. This is an indicator of an ageing population and is a reflection of low fertility and falling mortality. Migration factors have some effect on population ageing but in recent years overseas and interstate movements to and from South Australia have been insufficient to influence age distribution to any marked degree.

A further indicator of the States ageing population is its rising median age. At 34.6 years in 1993 the South Australian median was more than a year above the Australian median of 33.4 years. The median age had fallen from 31.3 years in 1961 to 27.5 in 1971 but has risen steadily over the last 20 years.

#### Marriage and Divorce

There were 9,114 marriages registered in South Australia in 1993. This was the lowest number since 1966 and of those persons marrying more than 25% had been married previously. Over the past 20 years marriage rates have declined (notably first marriage rates), the median ages of both brides and bridegrooms have increased and the proportion of marriages where at least one partner has been married previously has shown an upward trend.

There were 4,063 divorces granted in 1993. In the years immediately before 1976 there were approximately 2,000 divorces each year. However, 1976 was the first year of operation of the Family Law Act and there were 6,142 divorces granted in that year. Since then the annual number of divorces has fluctuated between 3,700 and 4,600.

#### Projections of the Population

The South Australian population is projected to grow from 1.47 million in 1994 to between 1.62 and 1.74 million in 2041, entering a period of stable or even declining population towards the middle of the next century.

Population projections have been prepared based on a number of assumptions concerning future levels of fertility, mortality and migration. These assumptions lead to a range of projections for the State.

#### PROJECTED POPULATION (INCLUDING MIGRATION)(a)

		(,		
At 30 June	Series A	Series B	Series C	Series D
1996	1,483.3	1,486.9	1,485.2	1,484.0
2001	1,522.0	1,530.1	1,530.9	1,528.4
2006	1,554.4	1,568.2	1,573.3	1,568.5
2011	1,580.3	1,600.3	1,609.2	1,602.7
2016	1,602.2	1,628.6	1,641.3	1,633.1
2021	1,620.3	1,653,3	1,670.4	1,660.2
2026	1,632.7	1,672.6	1,696.0	1,682.0
2031	1,637.6	1,684.5	1,716.3	1,696.5
2036	1,633.7	1,687.9	1,729.7	1,702.7
2041	1,622.3	1,683.8	1,736.4	1,701.3

(a) See Projections of the Populations of Australia, States and Territories, 1993 to 2041 (3222.0) for explanation of assumptions made in each series.

The projections indicate that for all series the proportion of the population aged under 15 is likely to decrease while the proportion 65 years and over is expected to increase.

#### Summary

In 1994 South Australia has an ageing population which is growing more slowly than Australia as a whole with modest immigration and declining fertility and mortality. Marriage rates appear to be falling slowly while divorce rates are relatively steady.

#### Further Reference

The demographic characteristics of the South Australian population are analysed in greater detail in the Australian Bureau of Statistics publication *Demography, South Australia* (3311.4) which is available from the ABS Bookshop, 55 Currie Street, Adelaide.

#### **ABS PUBLICATIONS AND PRODUCTS**

Statistics collected by the ABS are generally made available to clients in published form. Some, including those not published, are available in one or more of the following forms: microfiche, magnetic tape, computer printout, CD, floppy disk, photocopy and clerically extracted tabulation.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues on Tuesdays and Fridays a Publications Advice (1105.0) which lists publications to be released within the next few days. The Catalogue and Publications Advice are available from any ABS Office.

To receive ABS publications on a regular basis contact the ABS *Publication Mailing Service* on (008) 02 0608.

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office.

The ABS Information Consultancy Service has specialist staff to assist and advise clients with their statistical inquiries. For more detailed information about

these services call at the ABS, 55 Currie Street, Adelaide, telephone the Information Officer on (08) 237 7100, or write to Information Service, ABS, GPO Box 2272, Adelaide 5001.

The ABS also provides a Statistical Consultancy Service, for expert assistance in survey, sample and questionnaire design, data collection, processing and analysis, and statistical modelling. For more information contact Gary Niedorfer, telephone (08) 237 7379.
